A Full-Stack Web App for FDTC's Math Department

Developers: Bhakti Patel and Campbell Frost

Department of Computer Science, Francis Marion University, Florence, South Carolina

Abstract

The application seeks to optimize the Math Hub's operations at Florence Darlington Technical College by replacing the current Excel-based student sign-in system with a user-friendly interface and quick student search features. Additionally, it introduces a specialized manager's dashboard, offering a comprehensive overview of key metrics like student visits and operational hours.

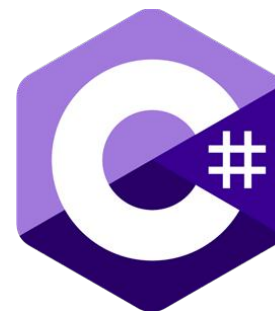

Methodologies

Agile is a flexible software development approach emphasizing adaptability and customer feedback. **Scrum** is a specific agile framework organizing work into time-boxed iterations (sprints) with a focus on regular feedback and continuous improvement.

Technologies

Blazor

Entity Framework

Azure SQL
